

MEET IN HEART OF NOOSA BIOSPHERE

The Noosa Biosphere Reserve is offering environmentally-minded event planners a green venue option for smaller groups. This internationally recognised biosphere promotes biodiversity conservation and sustainable development and offers Rimini by the River, a four-and-a-half star recently refurbished apartment complex.

"Rimini aims to be the perfect base for a superior small conference or meeting that requires a very cost-effective option that is centrally located and combines the best of what the biosphere region can offer," said on-site consultant, Cecilia Young, adding that meals, activities and door-to-door transfers from Brisbane and the Sunshine Coast Airports can be included in all packages.

Young said that they are able to assist with keeping costs within budget and value adding thanks to the partnerships the Biosphere has with local services such as The Boathouse based over the Noosa River.
